# **Pages**

The Pages feature in the Site Admin offers a powerful tool for real-time layout editing with an intuitive interface. This guide will walk you through creating pages, adding modules, and customizing them on your website.

Manage pages | Saving changes and deleting pages | Adding modules | Editing modules | Additional tips | Other modules

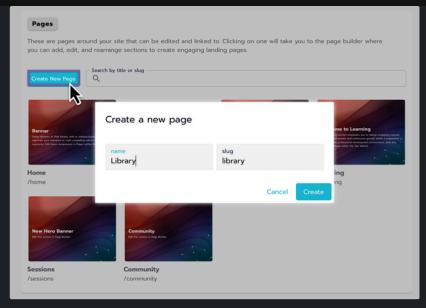

The Pages section of the Site Admin.

# Manage pages

# **Creating new pages**

- 1. Select the **Create New Page** button to start creating a new page.
- 2. Enter page details
  - o In the Create a New Page window, enter a Name for your page. (this name is seen on the front end)
  - Optionally, edit the auto-generated slug for the page.
  - Select Create to proceed or Cancel to discard.

Creating a new Page within the Pages section of the Site Admin

# **Customizing pages**

- Once created, select the newly created page from the Grid to customize it.
- The left-side navigation panel allows you to add and customize modules.
- The right side displays a preview of the page.

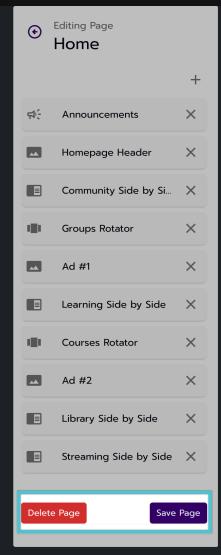

# Saving changes and deleting pages

# **Saving Changes**

- After making your edits, locate the **Save Page** button on the bottom right of the navigation panel.
- Select the **Save Page** button to ensure all your changes are preserved.

### **Deleting Pages**

- To delete an entire page, find the **Delete Page** button on the bottom left of the navigation panel.
- Select the **Delete Page** button, then confirm the deletion to remove the page.

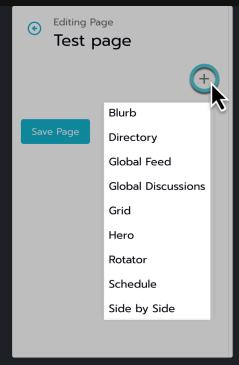

A view of the Save and Delete buttons on the page's navigation panel.

# Adding modules

Before you begin

Modules may or may not be available, depending on how your organization sets up the platform.

- 1. Select module type
  - Select the + icon in the left-side navigation to add a module.
- 2. Choose module
  - From the prompt, select the module type you want on the page (e.g., Hero, Side-By-Side).

Adding modules to a new page.

# **Editing modules**

After adding a module to a page, follow these steps to edit and arrange it.

### Navigate into the module

• Locate and select the module you want to edit. You will then be directed to the module, where you can make edits.

### **Editing modules**

• Use the provided options to modify the module's content and settings.

# **Arranging Modules**

- When multiple modules are present, you can reorder them by dragging and dropping the modules into different positions.
- See specific module options below.

# **Announcements (Global)**

### **Module Options**

- Name: You can change the module's name (not visible on the front end).
- Title
  - Defaults to **Announcements** but can be updated to any title.
  - $\circ\;$  The title is visible to the public and appears at the top of the module.
  - $\circ\;$  This field is optional and has no character limit.

### **Announcement check box Options**

- Global Feed
  - o Default: Off
  - $\circ~$  If selected, announcements from the global feed will be featured in this module.
  - Tooltip: This will show all announcements from the global feed.

- Global Discussions
  - o Default: Off
  - o If selected, announcements from global discussions will be featured in this component.
  - o Tooltip: This will show all announcements from global discussions.

# Blurb

# **Module options**

- Name: You can change the module's name (not visible on the front end).
- Large Editor: Access a spacious editing area using the Large Editor button.
- Blurb Editor: The Blurb editor provides a platform for adding, editing, and formatting text, emojis, and links using the TinyMCE editor.
  - Simultaneously, edit on the left and preview on the right.
- Full Width Option: At the bottom of the module, you can select a box to utilize the entire width of the page. This formatting option ensures that the blurb content fits across the whole page width where the module is placed.

### **Global Feed**

When a global feed module is added to a page, it serves as a centralized hub for sharing updates, announcements, and information relevant to the community.

### **Module options**

• Title: You can title the module (visible on the front end).

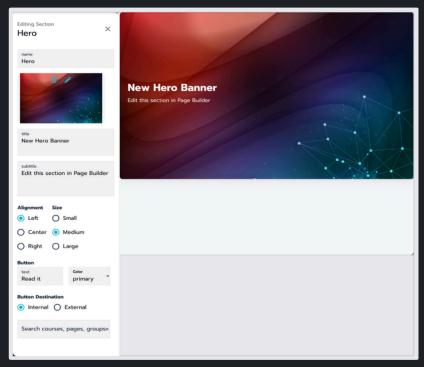

# **Global Discussions (Global Forum)**

When the module for Duscissions is added to a page, it serves several functions to facilitate communication and collaboration among users.

### **Module options**

• Title: You can title the module (visible on the front end).

# Hero (Banner)

Setting up a Banner Module.

### · Pre-populated text

• When editing a Banner module, it comes pre-populated with dummy text.

#### • Banner size

- $\circ\;$  Choose the size of your banner by selecting one of the radio button options:
  - Small
  - Medium
  - Large

### · Adding an image

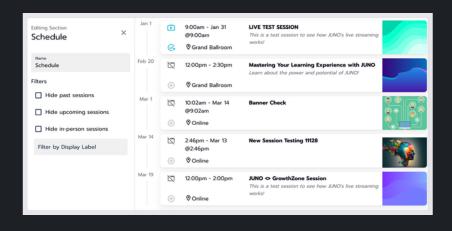

- $\circ\;$  Upload images for your module by using drag-and-drop or the file selector.
- Supported file types include png, jpg, jpeg, gif, webp, bmp, svg.
- You can edit the image multiple times by using the **pencil** icon or delete it and start over using the **trash can** icon.

### Text options

- Customize the alignment of the title, subtitle, and button using the radio buttons:
  - Left
  - Center
  - Right

# • Button design and destination

- If you're adding a button to the banner, follow these steps:
  - **Label** the button in the **Text** field.
  - Choose a **color** for the button from the available **dropdown** options.
  - Specify the destination for the button:
    - For an Internal item (default), search for the name of a course, page, group, or session already created in the Search field.
    - For an **External** item, select External using the radio button and enter a valid URL in the URL field.

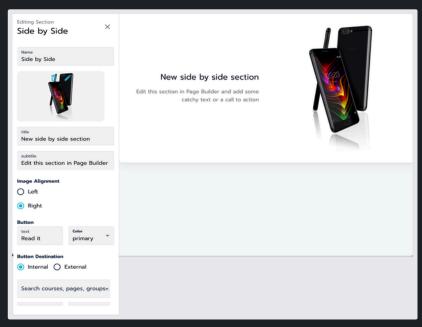

Setting up a Schedule module.

### **Module options**

- Name: You can change the module's name (not visible on the front end).
- **Filter Options**: Use the checkboxes to customize your session display preferences:
  - **Hide Past Sessions**: Hides any session with an end date earlier than the current time.
  - Hide Upcoming Sessions: Hides any session starting later than today.
  - **Hide In-Person Sessions:** Hides all in-person sessions.
  - Filter By Display Label: This allows you to label sessions and filter for specific labels.

### Side-By-Side

Setting up a Side-By-Side Module.

### · Pre-populated text

• Similar to the Banner module, Side-By-Side modules come with dummy text.

### • Adding an image

- Upload images for your module by using drag-and-drop or the file selector.
- Supported file types include **png**, **jpg**, **jpeg**, **gif**, **webp**, **bmp**, **svg**.
- You can edit the image multiple times by using the pencil icon or delete it and start over using the trash can icon.

# • Image alignment

- a. Choose which side you want your image on using the radio button options for Left or Right
- Button design and destination
  - If you're adding a button to the banner, follow these steps:
    - Label the button appropriately.
    - Choose a color for the button from the available options.
    - Specify the destination for the button:
      - For an Internal item (default), search for the name of a course, page, group, or session already created in the Search field.
      - For an External item, select External using the radio button and enter a valid URL in the URL field.

# Additional tips

- Experiment with different module types and configurations to achieve the layout you want.
- Seek assistance from your Client Success team representative if you encounter any difficulties.
