Creating or importing learning packaged courses

This guide will walk you through creating and importing learning packaged courses, ensuring compatibility and consistency across various Learning Management Systems (LMSs) and authoring tools.

🔓 **Who can edit this course information?**

- Site admins
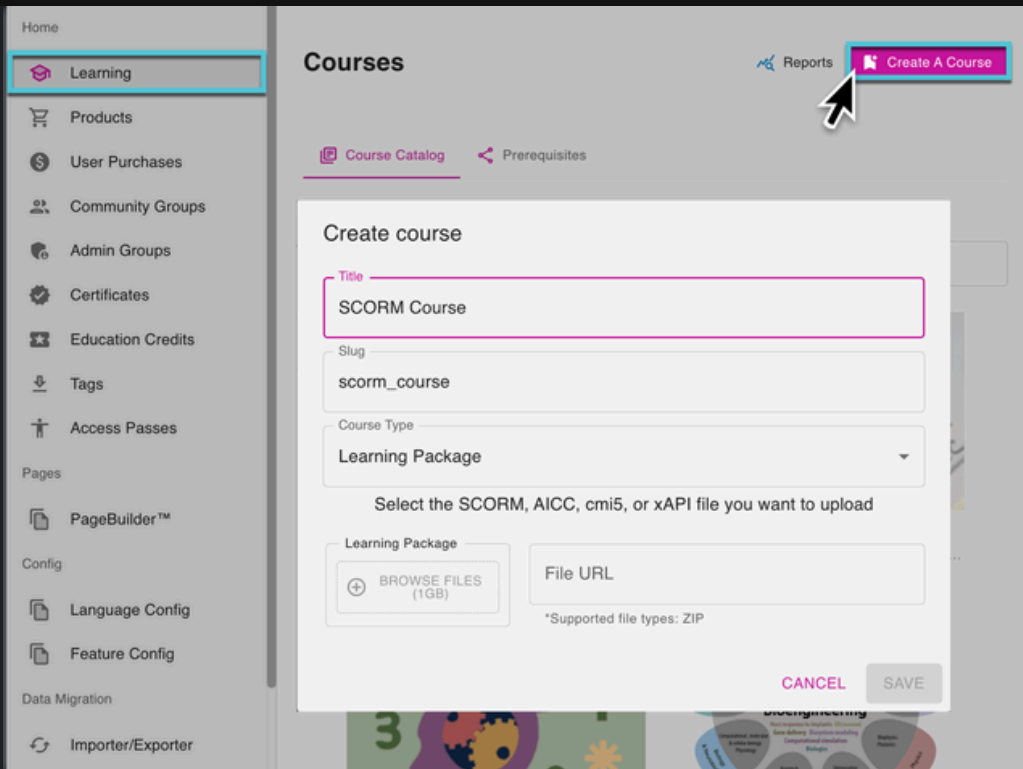

Das Admin and Learning Packages

⚠️ A note for Site Admins: Full access to Das admin is coming soon! Check back later for updates.

Accessing Das admin

1. Log in to **Das Admin** using your admin credentials.
2. Select **Create a Course** to initiate the course creation process.
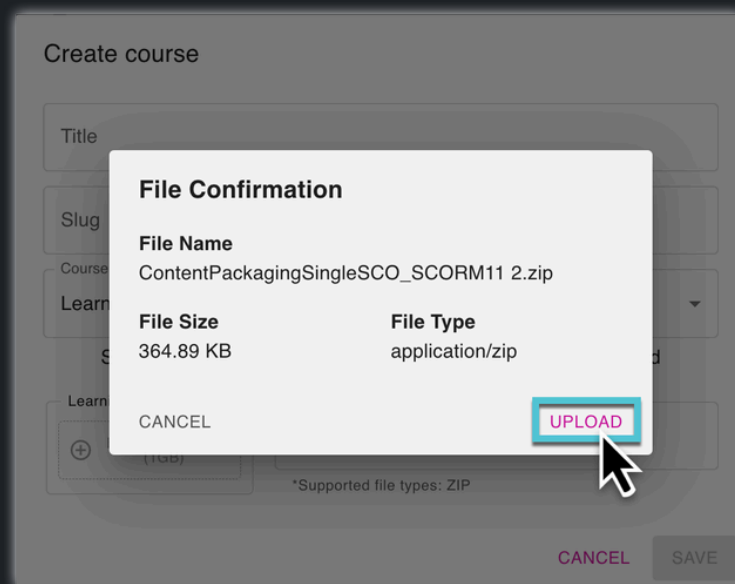

Course creation type

1. Give your course a Title (this will be updated once the SCORM file finished uploading)
2. the Slug is automatically generated from the title
3. From the **Course Type** dropdown, choose **Learning Package**.
4. Once you have selected **Learning Package**, new options will appear.
5. You can browse your device and select a compatible **Learning Package** (SCORM, xAPI, AICC, and cmi5) for upload.
6. Once you have selected an accepted file type, a new window will prompt you for confirmation of your upload.

Creating a Learning Package Course in Das admin.

File confirmation

1. You can select **Upload** or **Cancel** in the **File Confirmation** window
2. Once **Upload** is selected, the **File Confirmation** window closes, the file auto-generates a **URL**, and the **Save** button becomes available in the **Create a Course** window.

Confirming the File upload.

Course creation completion

1. Select the **Save** button to complete the **Learning Package Upload**.
2. The file upload will continue in the background. Once completed, the course title will update to the learning package name.

Importing a learning packaged course

ℹ️ Importing a **Learning Packaged Course** works seamlessly using our **LMS importing tool**. Learn more about importing courses.
