Editing sessions from the splash page

> 💡 **Who can edit sessions?**
>
> - Site admins and JUNO team members can edit all sessions.
> - Moderators can only edit the sessions they are attached to.

**Editing a Session from the splash page**

As a site admin or a moderator attached to a session, you can edit the session directly from the splash page. Here's how:

1. **Navigate to the Session Splash Page**
   - For a live session, select the **Go Back** button from the **session Preview** page. This will redirect you to the **session Pplash** page.
2. **Locate the Edit Session Button**
   - On the session splash page, the **Edit Session** button is on the left, replacing the usual **Join Session** or **Attend Session** (when the session is not live) button. The **Join Session** or **Attend Session** buttons are now featured on the right.

Accessing the Edit session button from a session splash page.

3. **Edit the Session**
   - Select the **Edit Session** button to access and edit all aspects of the session.

For more detailed information, learn more about editing sessions.
